

LOW ACID FOODS

Kids (under 10)

Q

When you open a jar of home-canned vegetables, what sound might you hear if it's safe?

LOW ACID FOODS

Kids (under 10)

ANSWER

**A little 'pop' from the lid
popping up**

FUN FACT

*A popping lid means the jar sealed
tight to keep food safe!*

Kids (under 10)

Q

Which tool helps make sure low acid foods like beans or meat get hot enough to be safe at home?

LOW ACID FOODS

Kids (under 10)

ANSWER

A pressure canner that uses steam and pressure

FUN FACT

Pressure canners use big heat to keep your food yummy and safe!

LOW ACID FOODS

Kids (under 10)

Q

If you live high on a mountain, what might you do to your pressure canner to keep your food safe?

LOW ACID FOODS

Kids (under 10)

ANSWER

Use more pressure because water boils at a lower temperature

FUN FACT

High places need extra pressure to cook food safely!

LOW ACID FOODS

Kids (under 10)

Q

What kind of food needs a pressure canner instead of boiling water to be safely canned at home?

LOW ACID FOODS

Kids (under 10)

ANSWER

Low acid foods like vegetables, meat, and fish

FUN FACT

Low acid foods need special heat to keep germs away!

Source: EM 9152 Safely canning foods

LOW ACID FOODS

Kids (under 10)

Q

Why can't we just use boiling water to can low acid foods like green beans safely?

LOW ACID FOODS

Kids (under 10)

ANSWER

Because boiling water isn't hot enough to kill bacteria in low acid foods

FUN FACT

Pressure canners get hotter than boiling water to keep food safe!

LOW ACID FOODS

Kids (under 10)

Q

What is something fun you see when using a pressure canner for the first time?

LOW ACID FOODS

Kids (under 10)

ANSWER

Steam comes out and the lid locks tight!

FUN FACT

Steam helps get the food inside very hot so it stays safe.

LOW ACID FOODS

Kids (under 10)

Q

If you hear a steady hissing or puffing noise from your pressure canner, what is that?

LOW ACID FOODS

Kids (under 10)

ANSWER

Steam escaping from the vent tube

FUN FACT

That steam means the canner is working hard to keep the food safe.

LOW ACID FOODS

Kids (under 10)

Q

Which lid type tells you that your home canned jar sealed and is safe to eat?

LOW ACID FOODS

Kids (under 10)

ANSWER

A lid that stays pressed down flat and doesn't pop up

FUN FACT

A tight lid means air can't get into the jar to spoil the food.

LOW ACID FOODS

Kids (under 10)

Q

What does the dial or weighted gauge on a pressure canner do?

LOW ACID FOODS

Kids (under 10)

ANSWER

It helps you know the right pressure for safe canning

FUN FACT

Watching the gauge helps keep your food safe when canning low acid foods!

LOW ACID FOODS

Kids (under 10)

Q

Which food is considered low acid and needs pressure canning at home?

LOW ACID FOODS

Kids (under 10)

ANSWER

Cooked green beans

FUN FACT

Green beans need extra heat from pressure canning to be safe.

LOW ACID FOODS

Kids (under 10)

Q

How do you feel when you carefully open the lid of a pressure canner after it cools?

LOW ACID FOODS

Kids (under 10)

ANSWER

Warm steam blowing away, but safely not too hot

FUN FACT

Opening the lid slow and away from your face keeps you safe from hot steam!

LOW ACID FOODS

Kids (under 10)

Q

Why do jars need space (headspace) at the top inside a pressure canner?

LOW ACID FOODS

Kids (under 10)

ANSWER

**So food can expand safely
when heated**

FUN FACT

*Leaving space helps jars not break
during cooking!*

LOW ACID FOODS

Kids (under 10)

Q

What color might the food be if it's been safely pressure canned and stored?

LOW ACID FOODS

Kids (under 10)

ANSWER

Bright or close to fresh colors

FUN FACT

Good color means your canned food looks tasty and fresh!

LOW ACID FOODS

Kids (under 10)

Q

Which smell might tell you a home canned jar has gone bad and you shouldn't eat it?

LOW ACID FOODS

Kids (under 10)

ANSWER

A sour or rotten smell when opened

FUN FACT

Bad smells mean germs grew inside, so don't eat it!

LOW ACID FOODS

Kids (under 10)

Q

When using a pressure canner, can you open the lid while the food is cooking inside?

LOW ACID FOODS

Kids (under 10)

ANSWER

**No, always wait until it cools
and pressure is gone**

FUN FACT

*Opening too early can be dangerous
because of hot steam and bubbles!*

LOW ACID FOODS

Kids (under 10)

Q

Which food is NOT a low acid food that needs pressure canning?

LOW ACID FOODS

Kids (under 10)

ANSWER

Peach slices packed in syrup

FUN FACT

Sweet fruits usually can be safely canned in boiling water, not pressure canners.

LOW ACID FOODS

Kids (under 10)

Q

If your home canned jar lid lifts and wobbles when pressed, what does that mean?

LOW ACID FOODS

Kids (under 10)

ANSWER

The jar didn't seal right and food might spoil

FUN FACT

A good sealed lid won't move when pushed in the middle!

LOW ACID FOODS

Kids (under 10)

Q

If you want to can your own chicken safely at home, what do you need to use?

LOW ACID FOODS

Kids (under 10)

ANSWER

A pressure canner to make it safe

FUN FACT

Pressure canners kill bacteria so your canned chicken is safe to eat!

Source: EM 9152 Safely canning foods

LOW ACID FOODS

Kids (under 10)

Q

Which is a sign that your pressure canner is working properly during canning?

LOW ACID FOODS

Kids (under 10)

ANSWER

Steam is gently escaping from the vent tube

FUN FACT

Steam tells you the canner is building pressure for safety.

Source: PNW 421 Use care operation of your pressure canner

LOW ACID FOODS

Kids (under 10)

Q

What should you do after removing jars from a pressure canner to help them seal well?

LOW ACID FOODS

Kids (under 10)

ANSWER

Let the jars sit on the counter and cool without tightening the lids

FUN FACT

Cooling jars slowly helps make a tight lid seal for safe storage!
