Q

**Which of these foods
needs to be kept cold in
the refrigerator to stay
safe?**

FOOD SAFETY

Kids (under 10)

ANSWER

Fresh eggs

FUN FACT

Cold stops bad germs from growing fast!

Source: PNW 720 Proper egg handling

Q

If you see fuzzy mold on home preserved food, what should you do?

Kids (under 10)

ANSWER

Tell a grown-up and do not eat it

FUN FACT

Some molds can make food unsafe to eat!

Source: SP 50-934 USDA molds on food

Q

Why do people add vinegar when making pickles to keep them safe?

FOOD SAFETY

Kids (under 10)

ANSWER

Vinegar makes food sour so bad germs can't grow

FUN FACT

Sour food stops harmful bacteria from growing!

Source: SP 50-493 Ways food is preserved

Q

What does a sour smell or bubbles on preserved food usually mean?

Kids (under 10)

ANSWER

**The food is starting to spoil
and might be unsafe**

FUN FACT

Bubbles mean tiny yeasty germs are growing!

Source: SP 50-493 Ways food is preserved

FOOD SAFETY

Kids (under 10)

Q

When you help in the kitchen, what should you always do before touching food?

FOOD SAFETY

Kids (under 10)

ANSWER

Wash your hands with soap and water

FUN FACT

Clean hands help keep food safe from germs!

Source: PNW 250 You can prevent food borne illness

Q

What is a sign that eggs are cooked safely to eat?

FOOD SAFETY

Kids (under 10)

ANSWER

Both the white and yolk are firm, not runny

FUN FACT

Properly cooked eggs help stop germs like Salmonella!

Source: PNW 720 Proper egg handling

Kids (under 10)

Q

Why do grown-ups keep food in a fridge or freezer after it's cooked?

FOOD SAFETY

Kids (under 10)

ANSWER

Because cold keeps bad germs from growing quickly

FUN FACT

Cold slows down germs so food stays safe longer!

Source: PNW 250 You can prevent food borne illness

FOOD SAFETY

Kids (under 10)

Q

You see a jar of pickles with bright green color and clear crunchy cucumbers. What can you guess?

FOOD SAFETY

Kids (under 10)

ANSWER

The jar was made with safe ingredients and kept properly

FUN FACT

Fresh pickles look bright, not cloudy or gray!

Source: SP 50-494 Using preserved foods safely

FOOD SAFETY

Kids (under 10)

Q

**If you see eggshells,
should you use them to
touch other food without
washing your hands?**

ANSWER

No, because eggshells can have germs.

FUN FACT

Eggshells might look clean, but they can have tiny germs that can make food unsafe. That's why grown-ups wash their hands after handling eggs!

Source: PNW 720 Proper egg handling

Q

Why do some foods need to be heated very hot when home canned?

Kids (under 10)

ANSWER

To kill harmful bacteria that can cause sickness

FUN FACT

Heat helps keep canned food safe to eat!

Source: SP 50-493 Ways food is preserved

Q

**If a frozen food thaws,
what should a grown-up
do to keep it safe?**

FOOD SAFETY

Kids (under 10)

ANSWER

Cook it right away or throw it away if not safe

FUN FACT

Thawed food can grow germs fast if not handled right!

Source: SP 50-470 If your home freezer stops

FOOD SAFETY

Kids (under 10)

Q

When you see a jar of food with the lid still popping up and down when touched, what does that tell you?

FOOD SAFETY

Kids (under 10)

ANSWER

The jar is not sealed tightly and might not be safe to eat.

FUN FACT

A lid that stays down flat usually means the jar is sealed tightly and keeps the food safe!

Source: SP 50-493 Ways food is preserved

Q

When making jam or jelly, why do grown-ups add lots of sugar?

FOOD SAFETY

Kids (under 10)
