

IS THIS SAFE?

You see your family washing fresh fruits and vegetables carefully under running water before eating them. They also wash their hands well before preparing the food.

IS THIS SAFE?

You find a jar of homemade jam in the fridge with fuzzy mold growing on top. The lid has not popped up, but the jam has green and white fuzzy spots.

IS THIS SAFE?

You see a bowl of potato salad sitting on the kitchen table on a warm afternoon. It has been there for a little while. You wonder if it is still safe to eat.

IS THIS SAFE?

You watch Grandma put fresh, firm peaches into clean jars. After she finishes, she puts new lids on the jars and carefully makes sure the lids stay flat and don't pop up when she presses them.

IS THIS SAFE?

You notice a jar of canned cherries in the cupboard with a lid that looks bulged and when you press it, the lid pops up. The jam inside looks cloudy and smells funny.

IS THIS SAFE?

You see a jar of figs on the shelf that Grandma made. The lid is closed tight, and the fruit looks normal. But you don't know if Grandma added something special to keep the fruit safe.

IS THIS SAFE?

You see a jar of salsa on the shelf with a lid that is tightly sealed and flat on top, and it smells fresh and a little tangy when you sniff it carefully.

IS THIS SAFE?

You see a jar of tomatoes in the kitchen, but the lid is sticking up like it's puffed out. When the jar is opened, it smells yucky and rotten.

IS THIS SAFE?

You see a jar of homemade salsa on the counter that was left out overnight, but when you look at it, there is no mold or funny smell on it.

LOW ACID FOODS

Kids (under 10)

LA-K01

IS THIS SAFE?

You see jars of canned green beans in the pantry. The jars were packed by an adult using a special cooker that locks tight and gets really hot. The jars have tight lids and no bubbles or strange smells.

IS THIS SAFE?

Grandma left a jar of grape jelly on the counter overnight. It looks okay, but you smell a little sour smell when you open the jar.

Sort it: **SAFE** · NOT SAFE · IT DEPENDS

IS THIS SAFE?

You find a box of frozen peas in the freezer, and the freezer door is closed tight. The peas look bright green and don't smell funny at all. Your family always checks the freezer temperature and keeps it very cold.

IS THIS SAFE?

You see a leftover sandwich on the kitchen counter all day while your family was busy. The sandwich has cold cuts and cheese. Later you find it forgotten there and wonder if it's okay to eat.

IS THIS SAFE?

You notice some frozen berries in the freezer have frost on the outside and the bag is partially open. They don't smell bad, but the berries look a little mushy when you touch them.

IS THIS SAFE?

You see some meat jerky drying in the oven, and an adult checks the temperature to make sure it gets really hot before drying it. The jerky looks dry and ready.

IS THIS SAFE?

You notice some fish in the smoker that looks wet and smoky, but it hasn't reached the right temperature all the way through. The adult leaves it there.

IS THIS SAFE?

You see an adult drying fruit on the counter near the open window. Sometimes flies come inside and land on the fruit. The fruit looks okay, but you wonder if it's safe.
