

Recipe card swap station — Recipe index

VERIFY BEFORE YOU DISTRIBUTE: These cards were extracted from the cited OSU/USDA publications by an assistant. A Master Food Preserver must confirm each recipe against its source publication before printing for the public. Recipes marked "auto-verified" matched a retrieved source; the others still cite a real publication but were not auto-confirmed - check those especially.

Strawberry Jam

auto-verified

Method: Water bath canning | Difficulty: Beginner | Headspace 1/4 inch | Process 5 minutes at 0-1,000 ft, 10 minutes at 1,001-6,000 ft, 15 minutes above 6,000 ft | Yield about 8 half-pint jars

Source: SP 50-777 Jams jellies preserves with no added pectin, Revised January 2025, p. 3

Quoted: "Strawberry Jam (about 8 half-pint jars) - 2 quarts crushed strawberries - 6 cups sugar Sterilize canning jars. Combine berries and sugar; bring slowly to boiling, stirring occasionally until sugar dissolves. Cook rapidly until thick, about 40 minutes. As mixture thickens, stir frequently to prevent sticking."

Tomato Salsa (using slicing tomatoes)

verify against source

Method: Water bath canning | Difficulty: Intermediate | Headspace 1/2-inch | Process 15 minutes at 0-1,000 feet altitude; 20 minutes at 1,001-6,000 feet; or 25 minutes above 6,000 feet | Yield 4 pints

Source: PNW 395 Salsa recipes for canning, p. 7

Quoted: "Combine all ingredients in a large saucepan and bring to a boil, stirring frequently. Reduce heat and simmer 20 minutes, stirring occasionally. Ladle hot salsa into hot pint jars, leaving 1/2-inch headspace. Remove air bubbles and adjust headspace if needed. Wipe rims. Adjust lids and process in a boiling water canner 15 minutes at 0-1,000 feet altitude; 20 minutes at 1,001-6,000 feet; or 25 minutes above 6,000 feet."

Reduced Sodium Sliced Dill Pickles

verify against source

Method: Water bath canning | Difficulty: Beginner | Headspace 1/4 inch headspace (pour hot pickling solution over cucumbers, leaving 1/4-inch headspace) | Process 15 minutes pint jars at 0-1,000 ft; 20 minutes at 1,001-6,000 ft; 25 minutes above 6,000 ft | Yield About 8 pints

Source: SP 50-533 Pickles for special diet, Revised December 2024, p. 2

Quoted: "Reduced Sodium Sliced Dill Pickles Yield: About 8 pints Ingredients: 4 lbs pickling cucumbers (3 to 5 inches) 6 cups vinegar (5%) 6 cups sugar 2 tbsp canning or pickling salt 1 1/2 tsp celery seed 1 1/2 tsp mustard seed 2 large onions, thinly sliced 8 heads fresh dill - Wash cucumbers and cut 1/16 - inch slice off blossom end and discard. - Cut cucumbers in 1/4 - inch slices. - Combine vinegar, sugar, salt, celery, and mustard seeds in large saucepan. Bring mixture to boiling. - Place 2 slices of onion and 1/2 dill head on bottom of each pint jar. - Fill jars with cucumber slices, leaving 1/2 - inch headspace. - Add 1 slice of onion and 1/2 dill head on top. - Pour hot pickling solution over cucumbers, leaving 1/4 - inch headspace. - Adjust lids and process according to the recommendations in table below. Recommended process time for Reduced - Sodium Sliced Dill Pickles in a boiling - water canner. Process Time at Elevations of Style of Pack Jar Size 0 - 1,000 ft 1,001 - 6,000 ft Above 6,000 ft Raw Pints 15 min 20 min 25 min"

Canned peaches

verify against source

Method: Water bath canning | Difficulty: Beginner | Headspace 1/2-inch | Process Recommended process time for Peaches, halved or sliced in a boiling-water canner:

Style of Pack | Jar Size | 0 - 1,000 ft | 1,001 - 3,000 ft | 3,001 - 6,000 ft | Above 6,000 ft

Hot Pack | Pints | 20 min | 25 min | 30 min | 35 min

Hot Pack | Quarts | 25 min | 30 min | 35 min | 40 min

Raw Pack | Pints | 25 min | 30 min | 35 min | 40 min

Raw Pack | Quarts | 30 min | 35 min | 40 min | 45 min

After processing, wait 5 minutes before removing jars. | Yield Varies depending on quantity processed

Source: SP 50-444 Preserving peaches, Revised July 2024, p. page 2

Quoted: "Use either the hot or raw pack method: Procedure: Dip fruit in boiling water for 30 to 60 seconds until skins loosen. Dip quickly in cold water and slip off skins. Cut in half, remove pits and slice if desired. ... Fill jars with hot fruit and cooking liquid, leaving 1/2-inch headspace. Place halves in layers, cut side down. Raw pack - Note: Raw pack peaches may be poorer quality. Fill jars with raw fruit, cut side down, and add hot water, juice or syrup, leaving 1/2- inch headspace. Adjust lids and rings and process in a boiling water canner Recommended process time for Peaches, halved or sliced in a boiling-water canner. Process Time at Elevations ... After processing, take canner off heat. Remove lid and wait 5 minutes before removing jars."

Whole or halved tomatoes, packed raw without added liquid

[verify against source](#)

Method: Water bath canning | Difficulty: Beginner | Headspace 1/2 inch | Process Boiling water canner processing time for whole or halved tomatoes packed raw without added liquid:

Pint or Quart jars - 40 minutes at 0-1,000 ft altitude

Increase time for higher altitudes as follows:

20 min at 1,001-3,000 ft, 25 min at 3,001-6,000 ft, 30 min at 6,001-8,000 ft | Yield Not specified exactly for this product type, typically about 3 pounds tomatoes per quart jar

Source: *PNW 300 Canning tomatoes and tomato products*, p. 10-11

Quoted: "Whole or halved Packed raw without added liquid Prepare tomatoes as directed (pp. 3-4). Leave whole or halve. Loosely fill jars with raw tomatoes, pressing until spaces fill with juice. Leave 1/2 inch headspace. Add acid (pp. 4-5). If desired, add salt (p. 5). Adjust lids, and process in a boiling water canner or pressure canner"

Green beans

[auto-verified](#)

Method: Pressure canning | Difficulty: Beginner | Headspace 1 inch | Process Pints for 20 minutes; quarts for 25 minutes at 240 deg F (10 pounds pressure weighted gauge or 11 pounds dial gauge). Wait 5 minutes before removing jars after processing. | Yield Approximately 11/2 to 21/2 pounds of beans per quart jar.

Source: *SP 50-445 Preserving green italian or wax beans*, Revised February 2015, p. 1-2

Quoted: "Use either the hot or raw pack method: Hot Pack - Cover the beans with boiling water and boil for 5 minutes. Pack hot beans loosely in jars. Add salt, if desired (1/2 teaspoon per pint; 1 teaspoon per quart). Cover with boiling water, leaving 1 inch headspace. Process 240 deg F: pints for 20 minutes; quarts for 25 minutes."

Canned Pears

[verify against source](#)

Method: Water bath canning | Difficulty: Beginner | Headspace 1/2 inch | Process Hot pack: Pints 20 minutes, Quarts 25 minutes. Raw pack: Pints 25 minutes, Quarts 30 minutes.

Altitude adjustments: Hot pack pints - 1,001 to 3,000 ft: 25 min; 3,001 to 6,000 ft: 30 min; 6,001 & above: 35 min.

Hot pack quarts - 1,001 to 3,000 ft: 30 min; 3,001 to 6,000 ft: 35 min; 6,001 & above: 40 min.

Raw pack pints - 1,001 to 3,000 ft: 30 min; 3,001 to 6,000 ft: 35 min; 6,001 & above: 40 min.

Raw pack quarts - 1,001 to 3,000 ft: 35 min; 3,001 to 6,000 ft: 40 min; 6,001 & above: 45 min. | Yield Varies; example given is for 9-pint load

Source: *SP 50-678 Preserving pears*, Revised May 2024, p. Page 2

Quoted: "Hot pack - Drain pears, place into hot syrup and simmer 5 minutes or until pears are heated through. Pack hot pears in jars and cover with boiling syrup, leaving 1/2 inch headspace. Remove air bubbles by running a plastic spatula or bubbler between the jar and the fruit. Wipe rims and adjust lids. Process pints for 20 minutes in a boiling water canner; quarts 25 minutes. Please see Altitude Adjustment Chart below for processing times above 1,000 feet."

Bread-and-Butter Pickles

[verify against source](#)

Method: Water bath canning | Difficulty: Intermediate | Headspace 1/2 inch | Process Altitude 0-1,000 ft: Pint 10 min; 1,001 - 6,000 ft: 15 min; above 6,001 ft: 20 min | Yield About 8 pints or 4 quarts

Source: *PNW 355 Pickling vegetables*, p. 12

Quoted: "Bread-and-Butter Pickles **INGREDIENTS** 6 pounds pickling cucumbers (4- to 5-inch) - 8 cups thinly sliced onions (about 3 pounds) - 1/2 cup canning or pickling salt - Ice - 4 cups vinegar (5% acidity) - 4 1/2 cups sugar - 2 Tablespoons mustard seed - 1 1/2 Tablespoons celery seed - 1 Tablespoon ground turmeric - **Yield** : About 8 pints or 4 quarts **PROCEDURE** Wash cucumbers. Cut 1/16 inch off blossom end and discard. Cut into 3/16-inch slices. Combine cucumbers and onions in a large bowl. Add salt. Cover with 2 inches crushed or cubed ice. Refrigerate 3 to 4 hours, adding more ice as needed. Drain. Combine remaining ingredients in a large pot. Boil 10 minutes. Add cucumbers and onions to the vinegar solution and slowly reheat to boiling. Fill hot pint or quart jars with slices and cooking syrup, leaving 1/2 inch headspace. Remove air bubbles and adjust headspace, if needed. Adjust lids and process in a boiling water canner as follows ...""

Berry Jams (Blackberry, Blueberry, Boysenberry, Dewberry, Gooseberry, Loganberry, Raspberry)

Method: Water bath canning | Difficulty: Beginner | Headspace 1/4 inch | Process Process all jelled products in a boiling water canner. Process half pints and pints for 5 minutes (or time specified in recipe). | Yield 7 or 8 half-pint jars

Source: *SP 50-777 Jams jellies preserves with no added pectin*, Revised January 2025, p. 1

Quoted: "Berry Jams (7 or 8 half - pint jars) (Blackberry, Blueberry, Boysenberry, Dewberry, Gooseberry, Loganberry, Raspberry, Youngberry) - 9 cups crushed berries - 6 cups sugar ... Pour hot jam into hot jars, leaving 1/4 inch headspace, wipe jar rims, adjust lids, and process in a boiling water canner."

No Sugar Added Pickled Beets

[verify against source](#)

Method: Water bath canning | Difficulty: Intermediate | Headspace 1/2 - inch | Process Pints: 30 minutes at 0 - 1,000 ft, 35 minutes at 1,001 - 3,000 ft, 40 minutes at 3,001 - 6,000 ft, 45 minutes at above 6,000 ft | Yield About 8 pints

Source: *SP 50-533 Pickles for special diet, Revised December 2024, p. 4*

Quoted: "No Sugar Added Pickled Beets Yield: About 8 pints Ingredients: 7 lbs. of 2 - to 2 - 1/2 - inch diameter beets 4 to 6 onions (2 - to 2 - 1/2 - inch diameter), if desired 6 cups apple cider or white distilled vinegar (5%) 1 - 1/2 teaspoons canning or pickling salt 2 cups Splenda® (optional) 3 cups water 2 cinnamon sticks 12 whole cloves - Wash and rinse pint canning jars; keep hot until ready to use. Prepare lids according to manufacturer's directions. - Trim off beet tops, leaving 1 inch of stem and roots to prevent bleeding of color. Wash thoroughly. Sort for size. Cover similar sizes together with boiling water and cook until tender (about 25 to 30 minutes). Caution: Drain and discard liquid. - Cool beets. Trim off roots and stems and slip off skins. Slice into 1/4 - inch slices. Peel, wash and thinly slice onions. - Combine vinegar, salt, Splenda®, and fresh water in large Dutch oven. Tie cinnamon sticks and cloves in cheesecloth bag and add to vinegar mixture. Bring to a boil. Add beets and onions. Simmer 5 minutes. Remove spice bag. - With a slotted spoon, fill hot beets and onion slices into clean, hot pint jars, leaving 1/2 - inch headspace. Cover with boiling hot vinegar solution, leaving 1/2 - inch headspace. Remove air bubbles and adjust headspace if needed. Wipe rims of jars with a dampened clean paper towel; apply two - piece metal canning lids. - Process in a boiling water canner according to the recommendations in the table below . Let cool, undisturbed, 12 to 24 hours and check for seals."

Canning Applesauce

[verify against source](#)

Method: Water bath canning | Difficulty: Beginner | Headspace 1/2 inch | Process Process time at elevations of Style of Pack Jar Size 0 - 1,000 ft 1,001 - 3 ,000 ft 3 ,001 - 6 ,000 ft Above 6,000 ft Hot Pints 15 min 20 20 25 Hot Quarts 20 25 30 35 | Yield Not specifically stated for applesauce, but related yield for Spiced Apple Rings is approximately 8 - 9 pints from 12 lbs. apples

Source: *SP 50-446 Preserving apples, p. 2*

Quoted: "Wash , peel and core apples. Peeling is especially important when making applesauce from windfalls. ... Reheat applesauce to boiling and pack hot into jars, leaving 1/2 inch headspace. Adjust lids and process in a boiling water canner according to the chart."

Canned Tuna

[verify against source](#)

Method: Pressure canning | Difficulty: Intermediate | Headspace 1 inch | Process 100 minutes

Process at 11 psi (dial gauge) or 10 psi (weighted gauge) at 0-2,000 ft altitude; increase pressure according to altitude:

Dial gauge: 12 psi at 2,001-4,000 ft; 13 psi at 4,001-6,000 ft; 14 psi at 6,001-8,000 ft

Weighted gauge: 15 psi above 1,000 ft | Yield Pints or half-pints

Source: *PNW 194 Canning seafood, p. 5-6*

Quoted: "Process time for tuna in a dial-gauge pressure canner Style of pack Jar size Process time Canner pressure (PSI) at an altitude of (feet) 0- 2,000 2,001- 4,000 4,001- 6,000 6,001- 8,000 Described above Half- pints or pints 100 min 11 lb 12 lb 13 lb 14 lb ... Pack pieces into hot half-pint or pint jars, pressing down gently to make a solid pack. Leave 1-inch headspace. Salt is optional. If desired, add 1/2 teaspoon salt per half pint or 1 teaspoon salt per pint... Process in a pressure canner as follows: Tuna 1. You may can tuna either raw or precooked... 3. For either raw or precooked tuna, peel off the skin with a sharp knife."
