Q

What temperature should you keep your dehydrator at when drying fruit leathers?

Tweens (10–14)

ANSWER

About 140°F

FUN FACT

You can test dryness by touching the fruit leather and it shouldn't leave a mark.

Q

What is a pellicle on smoked fish?

Tweens (10–14)

ANSWER

**A shiny, slightly sticky skin
that helps smoke stick**

FUN FACT

*The pellicle lets the smoky flavor soak
in evenly on the fish.*

Q

What happens if you don't heat smoked fish to at least 150°F?

Tweens (10–14)

ANSWER

Harmful bacteria can stay alive and make you sick

FUN FACT

Cooked fish safer to eat means happier tummies!

Source: PNW 238 Smoking fish at home

Q

How long does it usually take to dry fruit leather in a dehydrator at 140°F?

Tweens (10–14)

ANSWER

About 10 hours

FUN FACT

Drying times change if the air around you is very humid or dry!

Q

Why is it important to use uniform size pieces of fish when brining before smoking?

Tweens (10–14)

ANSWER

So all pieces get the same amount of salt

FUN FACT

Equal sizes help the fish salt evenly and stay safe to eat.

Q

What is the main reason jerky doesn't need to be refrigerated if prepared safely?

DEHYDRATING AND SMOKING

Tweens (10–14)

ANSWER

Most moisture is removed so bacteria can't grow

FUN FACT

Without water, bad germs can't live on jerky!

Source: PNW 632 Making jerky at home safely

Q

Why is grinding meat risky when making jerky?

Tweens (10–14)

ANSWER

Because grinding spreads germs throughout the meat

FUN FACT

Whole strips are easier to keep safe than ground meats for jerky.

Source: PNW 632 Making jerky at home safely

Q

What is one safe method to make jerky at home besides drying?

Tweens (10–14)

ANSWER

Precooking the meat before drying

FUN FACT

Cooking first helps kill germs in the meat before drying.

Source: PNW 632 Making jerky at home safely

Q

What type of salt should be used for brining fish before smoking?

Tweens (10–14)

ANSWER

Non-iodized table salt with no anticaking agent

FUN FACT

The right salt mix helps the fish get salty safely and evenly.

Source: PNW 238 Smoking fish at home

Q

What is an important storage tip for dried fruits and vegetables?

DEHYDRATING AND SMOKING

Tweens (10–14)

ANSWER

Keep them in a cool, dark, and dry place

FUN FACT

Light and heat can spoil dried food faster.

Source: PNW 397 Drying fruits and vegetables

Q

Which step helps ensure dried jerky is completely safe before storing?

Tweens (10–14)

ANSWER

Conditioning by storing it in a jar for a few days

FUN FACT

Conditioning helps even out moisture before storing jerky.

Source: PNW 632 Making jerky at home safely

Q

What happens if fish pieces overlap while brining?

Tweens (10–14)

ANSWER

**Salt won't soak in evenly,
risking spoilage**

FUN FACT

*Fish pieces need space to get the
right salty flavor all the way through.*

Source: PNW 238 Smoking fish at home

Q

What is the main reason we use smoke when smoking fish and meat?

Tweens (10–14)

ANSWER

Smoke helps preserve and add flavor

FUN FACT

Smoke also adds a cool flavor to your fish or meat!

Q

What should you do after drying fruit leather but before rolling it up?

Tweens (10–14)

ANSWER

**Peel it off the drying trays
while still warm**

FUN FACT

*Peeling warm leather helps keep it
soft and flexible.*

Source: SP 50-921 Drying herbs

Q

Why is hot-smoking fish safer than cold-smoking it?

Tweens (10–14)

ANSWER

Because hot-smoking cooks the fish to a safe temperature

FUN FACT

Cold-smoked fish can carry germs if not handled carefully.

Source: PNW 238 Smoking fish at home

Q

How much raw meat do you need to make about 4 ounces of jerky?

DEHYDRATING AND SMOKING

Tweens (10–14)

ANSWER

About 16 ounces

FUN FACT

Jerky shrinks a lot because the water is removed!

Source: PNW 632 Making jerky at home safely

Q

Why should dried foods be tested for dryness before storing?

Tweens (10–14)

ANSWER

To make sure no moisture remains that could cause spoilage

FUN FACT

No moisture means dried food can stay fresh much longer.
