

**Wash the tomatoes and
take off any bad spots.**

STEP

1

Canning Whole Tomatoes

Dip tomatoes in boiling water until skins start to split.

STEP

2

Canning Whole Tomatoes

Cool tomatoes in cold water and slip off the skins. Then remove the cores.

STEP

3

Canning Whole Tomatoes

Add lemon juice or citric acid to each jar to keep tomatoes safe.

! SAFETY STEP

STEP

4

Canning Whole Tomatoes

**Pack tomatoes in the jar
raw or hot, and cover with
hot tomato juice or water.**

! SAFETY STEP

STEP

5

Canning Whole Tomatoes

**If you want, add a little salt
for taste.**

STEP

6

Canning Whole Tomatoes

Remove air bubbles by sliding a non-metallic spatula around the jar.

! SAFETY STEP

STEP

7

Canning Whole Tomatoes

**Wipe the jar rims clean to
help the lid seal.**

! SAFETY STEP

STEP

8

Canning Whole Tomatoes

**Put the lid on tight just
right.**

! SAFETY STEP

STEP

9

Canning Whole Tomatoes

Put the jars into boiling water in the canner, making sure they are covered.

! SAFETY STEP

STEP

10

Canning Whole Tomatoes

Boil the jars for 40 minutes if quitting below 1,000 feet elevation (pint size).

! SAFETY STEP

STEP

11

Canning Whole Tomatoes

For quarts, boil jars for 45 minutes at low altitude.

! SAFETY STEP

STEP

12

Canning Whole Tomatoes

**After boiling, turn off heat
and wait 5 minutes before
taking jars out.**

! SAFETY STEP

STEP

13

Canning Whole Tomatoes

**Let jars cool undisturbed
for 12 to 24 hours so they
seal up tight.**

! SAFETY STEP

STEP

14

Canning Whole Tomatoes

**Check the lids to be sure
they are sealed before
storing.**
